- NEW Column Installation Brackets Available\*\*\*
- Will Never Chip, Rust or Splinter
- Stress Tested/Impact Resistant

Builder Select Railing combines commercial grade strength with beauty and elegance, creating a railing system that is practically maintenance free. The Builder Select Railing system has a Limited Lifetime warranty and is manufactured from stylish and strong impact resistant PVC.

Builder Select Railing has been engineered to accommodate normal temperature swings and changing climate conditions. It is manufactured from high quality rigid PVC with impact modifiers and high levels of Titanium Dioxide which prevent ultraviolet degradation. As with most plastics, vinyl will become less flexible in colder weather conditions; however, unless

subjected to unusual impact, it will not break. Builder Select Railing is categorized as Self-Extinguishing, meaning it has a high flash point, 716 degrees F, so it does not readily ignite and does not sustain combustion once the source of ignition is removed.

Meeting or exceeding all International Building Codes and all International Residential Codes allows Builder Select Railing to be used in commercial and residential construction. Installs in 6 easy steps saving time and money. Compared to the cracking, chipping, splintering, and constant painting of wood or the denting and rusting of aluminum and steel, nothing holds up better than Builder Select Rail.
