Shown with  
L-Assembled Column

RigidWrap™ is a fully assembled cPVC column with an internal aluminum post. The aluminum post makes a RigidWrap™ column load bearing. Brackets and hardware are included with the product. The brackets attach the aluminum post to the floor and beam/header. This secure connection delivers wind uplift resistance. The aluminum post and bracket may also be purchased separately for use with PermaWrap® L-Assembly columns or PermaSnap™ Column Wraps.
